NIVO ADJUSTABLE DECK PEDESTALS

A CLEVER SOLUTION FOR ARCHITECTS AND BUILDERS WHEN DESIGNING AND CONSTRUCTING RAISED FLOORS.

Create raised floors on balconies, roof gardens and temporary floors.
Ideal for laying decking over existing surfaces such as concrete or pavers.

NIVO decking pedestals allow easy installation of decking, outdoor tiles and pavers, and steel grating to create raised floors on balconies, roof gardens, and temporary floors.

NIVO Decking Pedestals can be used in conjunction with the StructurAL Aluminium deck support system, or with timber joists.

- ✓ **Easy Installation** – With Rotary Screw System, saves time
- ✓ **Accuracy** – Height adjustment allows for an exact fitting
- ✓ **Resistance** – Each pedestal can support a maximum weight of 1000kg
- ✓ **Quality** – Quality guarantees weather and UV radiation resistance
- ✓ **Access** – Easy access to under floor services, aiding maintenance
- ✓ **Recyclable** – Made from recyclable material and 100% recyclable
